

In the Specification

On page 81, immediately preceding the claims, please insert the enclosed text entitled "SEQUENCE LISTING".

In the Claims

Please add the following new claim 29:

- 29. A cellular library of mammalian cells containing a molecular library of retroviral constructs, said library of cells intracellular expressing at least 10^4 randomized peptides.--

REMARKS

Entry of this amendment is respectfully requested. The amendments are made in adherence with 37 C.F.R. § 1.821-1.825. This amendment is accompanied by a floppy disc containing the above named sequence, SEQUENCE ID NUMBERS 1-102 in computer readable form, and a paper copy of the sequence information. The computer readable sequence listing was prepared through use of the software program "PatentIn" provided by the PTO. The information contained in the computer readable disc is identical to that of the paper copy. This amendment contains no new matter. Applicant submits that this amendment, the accompanying computer readable sequence listing, and the paper copy thereof serve to place this application in a condition of adherence to the rules 37 C.F.R. § 1.821-1.825.

Claims 16-28 are under consideration. New claim 29 has been added by amendment. Support for Claim 29, more particularly for intracellular peptides, is found throughout the specification, for example at page 2 lines 13-20 which states that one object of the present invention is to provide compositions for the delivery of agents to subcellular locations. An Appendix of the newly pending Claims 16-29 is attached for the Examiner's convenience. The following comments are put forth at this time in response to rejection of the claims. Favorable consideration of the following comments relative to the outstanding rejections as they may apply to the present claims is respectfully requested for the reasons that follow.
